

Pnet Job Market Trends Report – April 2024

Issued by [Pnet](#)

7 May 2024

Welcome to the latest edition of the Pnet Job Market Trends Report, where you can gain data-driven insights into South African online labour market trends.

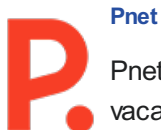

The monthly report reviews local hiring activity as well as regional job trends. In each edition we take a look at the jobs and job sectors that have been most in demand over the previous month. We also provide snapshots of specific job sectors, unpacking useful demographic data to guide recruiters in their recruitment planning and to give job seekers a view on what is hot and happening in the local job market.

Every edition includes a special feature unpacking relevant topics of interest. In the latest report, ***Pnet investigates scarce skills in the South African recruitment market*** and reveals the sectors most affected by skills shortages.
