

#SomeoneTellCNN... Kenya isn't happy with them

American news broadcaster, CNN, is getting some heat from the Kenyan Twitter community. This is ahead of Barack Obama's visit to the country, which CNN reported as a "terror hotbed".

It seems Obama's itinerary in the country was leaked which now has the White House on high security alert.

The Kenyan community has taken offense to the "terror" label, which they see as CNN ruining their moment as Obama visits the country, which many are calling his homecoming. Kenyans have since taken to Twitter to vent their frustration with the broadcaster, using the hashtag #SomeoneTellCNN.

“ Dear CNN, It would be prudent to note that we are not a backward banana republic but a highly informed & analytical nation.
