

Vox joins Internet Solutions in Cell C LTE-A package offering

Vox has joined Internet Solutions as a distribution partner of Cell C's fixed long term evolution-advanced (LTE-A) packages. The fixed LTE-A package is an easy-to-use, Sim card-based service, which will run over a network that provides end-users with higher throughputs.

The router and Sim card will be delivered via Internet Solutions' fulfilment partner, that will also perform Rica verification.
