

Air Tanzania first African-based operator to take delivery of the Airbus A220

Air Tanzania has become the first African carrier to take delivery of the Airbus A220 aircraft; and the latest member of Airbus aircraft operators. "The A220 unrivalled passenger comfort combined with its remarkable performance and economics will be an excellent asset to further develop Air Tanzania's network," said Tito Kasambala, Acting CEO, Tanzanian Government Flight Agency (TGFA).

Representatives from the airline as well as officials from the United Republic of Tanzania Government alongside executives from the A220 programme celebrated the aircraft handover at the A220 Mirabel assembly line.

The A220 will allow Air Tanzania to further develop its domestic and regional market as well as open new routes to India and the Middle East from its home base Dar es Salaam. "With the addition of the A220 in our fleet we are confident that we will expand our footprint in the growing African markets and beyond, as we unlock additional routes and regain our position as a key player in the African air transport market," added Ladislaus Matindi, managing director and CEO, Air Tanzania Company Limited.

Growing African markets

"After Europe, Asia and America, we are proud to see the A220 fly now also on the African continent and in Air Tanzania's livery. With over 240 Airbus aircraft flying in Africa and a large network of flight service offices in the region, we are ready to contribute to the airline's success," said Philippe Balducchi, CEO of the A220 partnership.

The A220 is the only aircraft purpose-built for the 100-150 seat market, it delivers fuel efficiency and widebody comfort in a single-aisle aircraft. The A220 brings together state-of-the-art aerodynamics, advanced materials and Pratt & Whitney's latest-generation PW1500G geared turbofan engines to offer at least 20% lower fuel burn per seat compared to previous generation aircraft. With a range of up to 3,200 nm (5020 km), the A220 offers the performance of larger single-aisle aircraft.
